Technology Center 2100

**IN THE TITLE**

The objection to the specification stated that, "The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed, including the critical claim feature 'address assignment'."

Pursuant to the Examiner's suggestion, please amend the title as follows. Please replace the title "Memory System Having Serial Selection of Memory Devices and Method" with the new title, "System and Method for Assigning Addresses to Memory Devices."

Reconsideration and withdrawal of the objection to the title is respectfully requested.
